PROFILE

As a final year Computer Engineering student, I possess a strong passion for crafting exceptional websites and web applications. With a successful 7-month internship as a web developer at a startup, I have gained hands-on experience and honed my skills in delivering impactful solutions. I aspire to excel as a software developer, seeking opportunities to grow my career in a challenging and dynamic work environment.

EXPERIENCE

Web Developer January 2023 - Present

Singularity Technologies, Thane

- Implemented frontend designs using HTML, CSS, Bootstrap, and JavaScript, ensuring an intuitive and visually appealing user interface.
- Worked on MySQL and basic backend functionalities, contributing to the overall development of the project.
- Collaborated with colleagues, enhancing communication skills through presentations.
- Attended client meetings, gaining valuable experience in negotiations and professional client communication.

Web Developer August – September 2022

Sahu Technologies (Remote)

- Developed a Daily Expense management system using MySQL, HTML, CSS, and JavaScript, creating an intuitive platform for efficient expense tracking and management.
- Implemented functionalities such as expense entry, categorization, and reporting, providing users with a comprehensive tool to manage their expenses effectively.
